Welcome

A warm welcome to the new HOF Beauty Book – the essential guide for professional therapists and practitioners.

With over 40 years' experience in the professional beauty business, HOF Beauty are a leading provider of professional salon equipment, furniture and beauty products. We are proud to be able to bring you the highest quality brands, plus the very best in technical advice and training.

HOF Beauty offer innovative, reliable beauty equipment along with expert guidance and training facilities. We specialise in Apilus advanced hair removal technology, advanced skincare, non-surgical equipment and body lifting systems. We offer brands that are tested and proven such as Ballet, SkinMate, advanced skincare range mccosmetics, Retinol and Oligodermie. The extensive choice of cosmetic surgery alternatives, includes mesotherapy skin peels and collagen anti-ageing solutions.

With these carefully selected ranges and prices to suit all budgets, we can provide professionals with the products and equipment they require to deliver their treatments and procedures. Our experienced staff are here to help you and we are confident that you will find the quality and the reliable service you deserve for your business.

There is no minimum order, and no pressure to buy, you can rely on HOF Beauty – so have a look at what we have to offer, we're sure you won't be disappointed.

Returns

Goods must be inspected on arrival and all claims for shortages and/or damages must be reported to HOF Beauty within 24 hours of receipt and a goods authorisation number must be obtained from customer services. Goods must be returned within 7 days of receipt in its original packaging. Please see terms and conditions for full returns policy on page 90.

Leasing

Turn your dream into a reality, with affordable leasing. Leasing enables you to use and earn money from the furniture and equipment you want, without a large outlay.

- No capital outlay
- Improves cash-flow
- Tax benefits
- Fixed monthly payments
- Ownership of the equipment at the end of the lease

Call our customer services department for more information.

Interest Free

We are pleased to extend up to 6 months interest free credit on selected equipment and furniture.

- Initial deposit of 50% of the total order including VAT
- Minimum monthly payment of £100

Call our customer services department for more information.

The Ultimate Solution

Apilus xCell sets a new standard in the field of 100% permanent hair removal by raising the efficiency, speed and comfort of its predecessors to a whole new level. Sophisticated design with touch screen, personalised treatment programs and the unique 27.12 MHz radio frequency all add up to give you a perfect combination of usability and performance.

Apilus xCell is unlike any other electrolysis machine. By gracing the machine with a flip-top aluminium cabinet, we were able to create an elegant, ergonomic and streamlined structure. Furthermore, its touch screen and intuitive navigation makes the Apilus xCell very user-friendly.

Quicker Results

A worldwide unique design, the Apilus xCell uses 27.12 MHz ultrafast radio frequency. Since this frequency is up to 6 times faster than that of other hair removal devices, the Apilus xCell focuses the energy more intensely at the base of the hair, producing permanent results much more quickly on all hair types.

Increased Power

The Apilus xCell is 35% more powerful than the Apilus Junior 3G and 10% more powerful than the Apilus Platinum. This additional power provides a faster coagulation, and therefore a higher level of comfort and effectiveness.

Exceptional Comfort

Thanks to its 27.12 MHz ultrafast radio frequency and exclusive techniques, the Apilus xCell offers an unparalleled level of comfort for permanent hair removal. In fact, the treatment is performed so quickly that the sensation is barely noticeable. Mere thousandths of a second are enough to eliminate unwanted hair. By offering such a high level of comfort, the Apilus xCell has become the preferred solution for all body areas and types of clients.

TRAINING
INCLUDED

Stand Out From The Crowd

On top of the renowned treatment modes like PicoFlash, Synchro and EvoluBlend, Apilus xCell offers electrologists two new methods of hair removal: MeloFlash and SynchroBlend. Combined with new programs specially optimised for men and women, these exclusive techniques will be your best allies in achieving 100% permanent hair removal in record time.

Enjoy Artificial Intelligence

The Apilus xCell is a device with exceptional intelligence. It thinks for you, while leaving you the freedom to modify the settings and to choose those that best suit each of your clients. Simply select the gender of your client, the treatment area, the hair size and the probe used, and the Apilus xCell will suggest the adequate treatment parameters. In addition, it automatically offsets the current depending on the level of moisture of the area, providing superior comfort and effectiveness.

Increase Your Revenue Streams

While Apilus xCell's main function is permanent hair removal, it does so much more. It's a 11-in-1 system that will allow you to offer complementary treatments to your clients and turn a profit on your investment.

- Permanent Hair Removal
- Anaphoresis
- Cataphoresis
- Iono Massage
- Light Therapy
- StimuloMassage
- Infrared Therapy

Manage Effectively

The Apilus xCell Pro version features a whole range of tools that facilitate the professional management of your work activities. Not only will you save time, but you will also be able to provide better customer follow-up, and offer more customised services. It's like having a personal assistant in your clinic at all times. These tools include:

- 1000 client files
- Appointment schedules with reminder lists
- Medical Records
- Treatment statistics

Angie Perfect Skin

Perfect skin with no telangiectasias, cherry angiomas, spider veins, skin tags, pigment spots or unsightly hair, this is what your clients dreams are made of. You now have the ability to make their wishes come true thanks to Angie 13.56 MHz, the advanced system that offers specific programs to treat skin imperfections as well as an optional mode for permanent hair removal. Thermocoagulation and hair removal treatments with Angie 13.56 MHz are gentle and yield rapid results.

Thermocoagulation

Thermocoagulation is a treatment that uses an ultrarapid radio frequency. This precision technique is used to coagulate certain superficial cutaneous imperfections in order to minimise their appearance. Here are some of the imperfections which can be successfully treated.

Vascular Imperfections

- Telangiectasias
- Spider veins
- Cherry angiomas
- Mature angiomas, commonly called "Campbell de Morgan spots"

Pigmentation Imperfections

- Age spots or spots due to photosensitivity

Raised Imperfections

- Skin tags
- Molluscums or milia grains

Modalities

- Telangiectasia
- Imperfection
- Pigmentation
- Cataphoresis - Post Treatment
- Permanent Hair Removal - Optional

Programs

- 24 Thermocoagulation Programs
- 24 Permanent Hair Removal Programs - Optional

Opti•vizion Flip

In electrolysis hair removal and micro-aesthetic care, precision is the name of the game. The one of a kind Opti•vizion Flip system is designed to offer modern beauty professionals much needed precision, comfort and productivity in their daily practice.

Clear Vision

Time and time again during your career as a beauty professional, you will have experienced situations that required a clearer, magnified vision. The Opti•vizion Flip is ideal for high precision treatments, allowing for the magnification of the treatment area up to 42 times its actual size. The device comes equipped with multiple intensity LED lights that emit barely any heat. The smallest details and the finest structures will be clearly visible, even on very light skin, which will enable you to raise the quality of your work and stand out from the competition.

- Better execution accuracy
- Improved quality of insertions in electroepilation
- Ergonomic positioning
- Intended for all high-precision treatments

Perfect for All Beauty Treatments

The Opti•vizion Flip system was intended for all high-precision treatments. Whether you are specialised in electrolysis, thermocoagulation, skin analysis, permanent make-up or dermatology applications, you will get better results in a more comfortable, natural working position.

Build Trust

With the Opti•vizion Flip system, the client is actively involved in all stages of the procedure. Indeed, you are now able to visually support and explain your treatment process step-by-step. Clients will be more relaxed, which will contribute in establishing a trust-based relationship.

Magnifying Lamp View

Ideal Posture

Having the right tools for the job can go a long way in making your life easier. The new Opti-vizion Flip system allows you to work keeping your head up instead of looking down, which relieves pressure on your neck and your back. Moreover, its integrated lenses and pivoting screen allow for smooth incremental adjustments and perfect working distance. Taken together, those features can greatly improve your overall comfort level, while preventing long term health problems linked to bad posture.

Features

- HD camera equipped with 13 inch screen
- 180° screen rotation system
- Multi-position camera mechanism
- Up to 42x (168 D) magnification
- Practical handles on each side
- Automatic focal control
- Multiple intensity LED light
- Ideal working distance thanks to a series of macro lenses (1+, 2+, 4+, 10+)
- 3-section-articulated arm with a 33 inches reach
- Ultra-stable base on castors

Silhouette Slimline Epilator

The Epil 100 electrolysis machine is one of the most accepted and used diathermy systems throughout the UK and overseas, providing fast and comfortable hair removal & thread vein treatments. It is thanks to a diathermy current that is delivered somewhat smoother than many of its competitors. It carries a 2 year guarantee and can be used on skin tags and thread veins. A needleholder (switched or unswitched) will be needed to operate this machine. If purchasing an unswitched needleholder you will also need a footswitch.

Overline Blend Epilator

This innovative blend method utilises low intensity currents for a perfect combination of the destructive action of electrolysis, with the rapid action of thermolysis. The blend considerably accelerates the destruction of the follicle, giving rapid results for even the most difficult hairs. Simple to operate and totally flexible. Thermolysis and electrolysis can be used independently. Supplied complete with foot switch and needleholder, including accessory pack.

Carlton Ultrablend

This Ultrablend combines two effective methods of epilation that simultaneously increase the success of the electrolysis treatment. D.C. - Galvanism produces lye at the negative pole, in this case the needle, to chemically destroy dermal papilla. This is a very slow method but the success rate is high. R.F. - Diathermy destroys the papilla by electrocoagulation quickly and effectively.

Overline Oxygen Infusion Therapy

Overline Oxygen Infusion Machine, for infusing oxygen and vitamins into the skin to encourage the growth of new cells and collagen. This beauty treatment can also rejuvenate skin that has been exposed to pollutants such as tobacco and other toxins that starve cells of vital oxygen.

Unlike microdermabrasion and other methods of smoothing out the skin for a more even tone, an oxygen infusion facial does not usually cause any side effects, such as stinging, itching, or burning. The method of delivery used in order to pump oxygen into the skin is gentle, which makes the treatment a viable option for those with sensitive skin and who have difficulties with injectables or other harsh methods in the treatment of wrinkles.

Those who have an oxygen facial can resume normal activities straight away and even apply makeup without the concern of how the skin will react.

In addition, while some treatments may prove prohibitively expensive, an oxygen facial is still far less outlay than botox injections or other chemical facial fillers. This treatment has even been used in the reduction of acne scars, as it is believed that the infusion of oxygen helps the skin to create new cells at a faster rate and reduce the appearance of blemishes.

This is why the procedure of oxygen infusion is proving so popular within the beauty trade.

iSol Oxygen Anti-Ageing Serum

Innovative, concentrated Anti-Age serum to use in conjunction with active oxygen to promote cell regeneration containing argan oil, rich in Vitamin E and fatty acids with anti-oxidant and moisturising properties. In a gradual and controlled way, active oxygen is released to promote cell regeneration. The Serum contains active ingredients, including stem cell ingredients to preserve the vitality of the skin. Hyaluronic acid liposomes provide the action of a filler.

10 x 10ml
3605
£49.50

iSol Oxygen Tri-Peptide Serum

Innovative serum containing argan oil, rich in Vitamin E and fatty acids with anti-oxidant and moisturising properties. In a gradual and controlled way, active oxygen is released to promote cell regeneration. This Serum contains Tri-Peptide which mimics the action of a functional molecule, which has a strong muscle relaxing effect and can attenuate expression lines by reducing muscle contractions. Other active ingredients, include stem cells for an anti-oxidant reaction. Hyaluronic acid liposomes then provide the action of a filler.

10 x 10ml
3606
£49.50

SkinMate Diamond Microdermabrasion

Microdermabrasion is a non-invasive cosmetic procedure that uses diamond heads and a vacuum to remove dead skin cells. It can be used on the face, neck, chest, back and hands. It is an excellent treatment to add to your beauty or aesthetic business due to the affordability of the treatment and the fact that clients can have it weekly.

Features & Benefits

- Includes 9 diamond heads, 3 handpieces and filters
- Removes dead skin cells and brightens dull complexion
- Minimises fine lines and wrinkles
- Evens out skin tone and texture
- Stimulates cell turnover, collagen and elastin production
- Reduces pigmentation and age spots
- Treats sun damage, acne scarring and stretch marks
- Increases circulation
- Increased absorption and penetration of skincare products

NEW

See page 49 for our Pure Collagen face masks

Overline Diamond Peel

Diamond peel is similar to crystal microdermabrasion, the difference is that diamond peel uses a diamond-tipped instrument of different sizes and coarseness while the traditional method uses a sandblasting device to spray aluminium oxide crystals on the skin.

This means that diamond peel can address delicate problem areas such as lip wrinkles and crow's feet which the traditional method often avoids to keep stray crystals from getting into the eyes and mouth.

Features & Benefits

- Precise & adjustable vacuum
- Removes dead skin cells and brightens dull complexion
- Minimises fine lines and wrinkles
- Evens out skin tone and texture
- Stimulates cell turnover, collagen and elastin production
- Reduces pigmentation and age spots
- Treats sun damage, acne scarring and stretch marks
- Increases circulation
- Increased absorption and penetration of skincare products

Apilus Vitalift Microcurrent

The Vitalift is the result of intense scientific research and extensive consultations with aesthetic professionals and physiotherapists who are experts in their field. The Vitalift's microcurrent circuitry, controlled by advanced and unique technology, ensures impressive results from any facial electrolifting treatment. By sending a specific microcurrent, the Vitalift initiates an efficient stimulation. This process firms the skin in order to produce a healthy and invigorating effect on the treated area.

Facial Lifting

The Vitalift mode offers you four treatment options designed to give the face a smooth and youthful aspect.

1 Facial Drainage

- Revitalises the skin
- Promotes toxin elimination
- Clears up the complexion and minimises the appearance of dark circles under the eyes

2 Automatic Stimulation - Self Adhesive Electrodes

- Firms the skin
- Yields a lifting effect and reduces the appearance of wrinkles
- Remodels facial contour

3 Specific Stimulation - Hand Held Electrodes

- Stimulates specific areas of the face to meet the needs of each client

4 Personalised Stimulation

- Designed to create and program advanced stimulation treatments in automatic or specific mode

200ml
3456
£25.00

SkinMate High Frequency

The high frequency facial is a skin care treatment used by professionals to help treat and prevent stubborn acne, shrink enlarged pores, reduce the appearance of fine lines and wrinkles, decongest puffy eyes, fade dark eye circles, rejuvenate the condition of the scalp and nourish hair follicles for healthier hair. High Frequency oxygenates the surface of the skin. When the glass electrode at the base of the device is directly applied to the skin, it immediately releases argon gas while also producing a small electric current, which kills surface bacteria and calms inflammation and redness.

Features & Benefits

- Increase in blood circulation and cell renewal
- Elimination of toxins
- Skin is left feeling instantly energised after just one treatment
- The ozone has a germicidal healing effect which is especially useful on congested skin

Carlton High Frequency

Carlton High Frequency creates current changes up to 200,000 times per second and the circuitry intensifies the mains voltage up to 150,000 volts with only minimal amperage, giving tremendous benefit to the client. The primary action of this current is thermal, or to produce heat. Because of its rapid oscillation there are no muscular contractions and the effects are either stimulating or soothing depending on the method of application.

Features & Benefits

- Direct high frequency and indirect hand massage option
- Encourages germicidal action
- Stimulates and allows better absorption of product
- High quality insulation handle inhibits transfer of current to therapist
- Supplied with five popular electrodes
- Changes up to 200,000 times per second

£595.00

Carlton Ultraderm High Frequency & Galvanic

Ultraderm is the very popular combination of high frequency and galvanic. It is contained in one neat and functional unit that is supplied complete with full accessories for facial therapy treatments. The Ultraderm has totally independent controls for each of its functions and is fitted with an LCD display to monitor the galvanic current, together with a polarity changeover switch. The Ultraderm is fitted with a quartz timer to assist the therapist in planning her facial treatment programme.

Features & Benefits

- Cleanses, treats skin and promotes oxygen
- Facial galvanic desincrustation/iontophoresis & high frequency
- Neat combination unit and great all rounder
- Treats young problematic skin, mature and dry skin

£375.00

SkinMate Radio Frequency

Radio Frequency is all about stimulating collagen production. This SkinMate machine is used to heat the skin to between 38–40 degrees with radio frequency waves, which feels like a hot stone face massage, it takes approximately 30 minutes to treat a whole face and there is no downtime. A client will get a tightening of the collagen fibres, so it's great to do before an event, but it also gives a long-lasting lift and increased volume. It also continues to promote collagen production over the four–six weeks following a treatment.

Features & Benefits

- Bipolar handpiece
- Tighter, firmer skin with visibly reduced fine lines
- Improved skin tone, colour and texture
- Improved lymphatic drainage, which leads to clearer skin
- Increased blood flow, which allows more oxygen and nutrients into the skin
- Improved metabolism in the skin
- A lifted appearance with improved facial contouring

£429.00

Smart Solo Radio Frequency

The Smart Solo Radio Frequency unit for the face. A non-invasive system which uses the latest radio frequency technology. Designed especially for facial skin rejuvenation. Amongst all the rejuvenating techniques that use heat to activate the subcutaneous fibroblasts, Radio Frequency is currently the most advanced system with regard to time scale and costs. The effects of radio frequency are not immediate, but are gradual and become more noticeable as the days and weeks go by, reaching their maximum effect even as long as 4 months after the treatment. Significant results are achieved in the areas of the cheeks, forehead and neck.

Features & Benefits

- Multipolar handpiece
- Stimulation of collagen growth
- Deep wrinkle reduction
- Skin firming
- Natural lasting result
- Non-Invasive
- Pain free
- Safe and fast

£24.95

Axis 27.12 MHz Radio Frequency Anti-Ageing Technology

Axis anti-ageing facial treatments effectively stimulates cells that produce collagen and elastin so the skin regains all its splendour. After only a few treatments, the skin is more radiant, its texture improved, wrinkles are reduced and the areas without tonicity are firmer.

Why Use The 27.12 mhz Radio Frequency

The main advantage of the 27.12 MHz frequency is the ultrafast change from positive to negative polarity, represented by its 27 million cycles per second (Hertz). Since it uses such a high-speed frequency, Axis generates the required energy in less time than other devices in its class, which, in turn, allows it to achieve visible results faster. The 27.12 MHz radio frequency also promotes better absorption of power by the water molecules contained in the skin. In short, at 27.12 MHz, less power output is needed to provide an effective treatment than would be necessary at a slower frequency.

Pulsed Electromagnetic Waves And Synchro Mode

The Axis device emits electromagnetic energy as pulsed waves. Through the unique Synchro mode, current is intersped with periods of thermal relaxation of varying set duration, adapted to the client's sensitivity level. This allows for optimal heat diffusion in the skin tissues, which in turn makes for more efficient and comfortable treatments.

Bipolar Or Monopolar

Axis uses bipolar technology which is simple to use, efficient and safe.

Handpieces

The Axis handpieces are designed to conform to the shape of the face and to target the imperfections and blemishes that need to be treated in a precise manner. Both are also equipped with a sensor that reads the skin's temperature during the treatment.

Fine Tip – Specific areas and wrinkles

Surface – Large areas – face, neck and neckline

Treatments

Firming Up

This treatment is specifically designed for sagging skin and helps to tone the face and neck area. Following this treatment, the skin is firmer and the face contour appears more defined.

Anti-Wrinkle

This treatment is perfect for mature skin. It significantly reduces the wrinkles on the face and neck. The skin then looks smoother and younger.

TRAINING
INCLUDED

Radiance/Sensitive Skin

Specifically designed for sensitive, young or lifeless skin, the Radiance/Sensitive Skin treatment is sure to be a hit with your clients. It revitalises the skin and gives it a healthy, radiant glow.

Scars/Ostia

This treatment is the perfect solution for skin imperfections. It reduces the appearance of scars and dilated ostia or pores and helps even out the skin.

Custom

This mode allows you to customise treatments according to the specific needs of each customer. The area, treatment settings and type of handpiece are all chosen by the technician.

A Smarter Device

Axis gives you access to intelligent programs aimed at simplifying your life. Simply select the desired treatment, your client's gender, the treatment area and the power level, and Axis will suggest suitable treatment settings. Of course you can override automatic settings at any time, according to the client's specific needs.

Treatments For All Skin Types

Axis enables the technician to monitor and control heat output at all times, so as to safely treat all skins, including the most sensitive. A program has also been created to deal specifically with sensitive skin. Even at a low intensity, radio frequency exposure increases the metabolic demand (ATP) and intensifies the zonal consumption of oxygen, without adverse heat-related effect.

Temperature Sensor

Axis' temperature sensor, which is integrated into the handpieces, allows for the on-screen display in real time of the skin's temperature during treatment. To ensure a safe and comfortable treatment, a maximum temperature threshold can also be set.

Stability Control

Unique to Axis technology, the MP/XCL-25 current control circuit offers extraordinary stability as well as the ability to systematically adjust the intensity of the current according to the impedance and moisture level of the treated area.

Watch-Dog XCL

The Watch-Dog XCL system continuously monitors the control circuit activity in order to immediately interrupt all current outputs in the event of an anomaly. Also, thanks to its powerful dual microprocessor, software activity will never interfere with the treatment.

Overline Radio Frequency Light Face

This Overline RF Light Face machine comes with a bipolar and multipolar handpiece, together with a light mask.

Bipolar Radio Frequency Face

This treatment with an extraordinary lifting effect, counteracts sagging skin. By raising the temperature of the existing connective tissue and activating, through heat, the fibroblasts to produce new Collagen and new Elastin, it reduces wrinkles and signs of ageing, rejuvenating the face, for a completely compacting and relaxing effect of the tissues. Natural significant results, visible after a few months.

Multipolar Radio Frequency Face

Used to obtain skin rejuvenation, thanks to the increase in subcutaneous temperature which causes a denaturation of collagen proteins, which shrink and thicken (lifting effect), leading to an increase in the consistency of the dermis. The thermal insult caused by the radio frequency also activates the fibroblasts with a consequent increase over time of collagen, elastin and therefore also an increase in dermal density, generating a greater distension of the tissues.

Light Face Mask - Rebalancing

Wellness chrome treatment that uses different colours that can be customised according to individual preferences, thus obtaining greater relaxation and benefit in the final phase of the treatment, which combined with the specific iSol Chrome masks, allows to intensify the result giving the face an illuminating final effect.

Red Light Therapy

Combats wrinkles and increases collagen production for smoother younger looking skin.

Blue Light Therapy

Eliminates acne-causing bacteria, reduces acne and helps to ease inflamed skin.

Green Light Therapy

Promotes healing and cell absorption. Evens out skin colour and helps reduce redness.

Overline Electroporation Mesotherapy

Electroporation is an advanced results driven therapy, also known as ‘non-needle mesotherapy’ is a process that we use to intensify the effects of vitamins, enzymes and plant extracts to rejuvenate and tighten the skin. Often used in conjunction with chemical peels. This treatment involves exposing skin to a light electrical field, which then reduces the cell wall’s resistance, rendering it more permeable. This then allows us to transfer a wide range of naturally nurturing solutions or oils into the skin cells, a treatment that is painless with no side effects. When carrying out electroporation, you use customised serums to treat a variety of problems, from hydrating very dry skin to reducing the redness associated with acne or rosacea. Depending on the individual skin condition and needs you can use mccosmetics professional ampoules, see below and pages 53 to 59 for our full range.

Electroporation can help

- Expression lines and wrinkles
- Acne scars
- Face firming and toning
- Anti-ageing
- Hyper-pigmentation
- Brightening of the skin
- Skin rejuvenation
- Skin hydration
- Rosacea
- Oily skin
- Lifting

Benefits

- Virtually painless
- Non-invasive
- Suitable for all skin types
- No side-effects
- Long-lasting
- Effective

SkinMate Multifunctional Beauty Machine

This innovative multifunctional tower has 9 functions in just one device. It has a modern feel to it, and is brilliant for saving space. A luxury combination of advanced skin treatment therapy machines.

Magnifying Lamp

For accurate skin diagnostics.

Air Brush Spray Gun

Can be used for spraying serum, toner and other water like liquid, can quickly atomise the serum, more conducive to skin absorption.

Facial Steamer

An essential treatment for all skin types to deep cleanse and purify the pores.

Skin Scrubber

Soft scrubbing is a non-invasive, relaxing treatment using ultrasonic frequency to remove keratinized skin cells, dirt and debris that has accumulated on the skin.

Radio Frequency

Is a highly effective procedure. It works best against loose and sagging skin, lines and wrinkles. Radio Frequency is pain-free and helps to achieve rejuvenating results on the face.

Spray Vacuum

Vacuum suction treatment is applied to the surface of the skin tissue causing lift and stimulation of the underlying structures. Improves blood and lymphatic circulation-bringing glow and clarifying the complexion.

Hot & Cold Hammer

The hot and cold hammer is used as a facial treatment and massage tool. The hot side of the hammer relaxes and opens pores while stimulating blood circulation beneath the skin. The cold side soothes tired and overheated skin, and closes pores while locking moisture into the skin.

High Frequency

Is a skin care treatment used by professionals to help treat and prevent stubborn acne, shrink enlarged pores, reduce the appearance of fine lines and wrinkles, decongest puffy eyes, fade dark eye circles, rejuvenate the condition of the scalp and nourish hair follicles for healthier hair.

Ultrasound

As well as heating and relaxing the muscles, ultrasound therapy breaks down scar tissue and increases local blood flow. All of this combines to increase healing rates in the area, making it a suitable way to speed up slow-healing or chronic issues.

SkinMate Microneedling Pen

Microneedling involves using fine needles to create hundreds of tiny, invisible puncture wounds in the top layer of skin. This minimally invasive treatment can be very effective. The micro-injuries you create stimulates the body's natural wound healing processes, resulting in cell turnover and increased collagen and elastin production, therefore reversing as well as preventing signs of ageing.

Features & Benefits

- 5 levels of speed
- Digital speed control display
- Adjustable needle depth 0.25mm to 2.5mm
- Improves wrinkles, minimises pore size & induces skin tightening
- Stimulates collagen production which promotes rejuvenation
- Improve surgical, traumatic, burn & acne scars
- Improves hyperpigmentation

mccosmetics Microneedling Pen

The mccosmetics microneedling pen is a micro-puncture device that aims to tighten and rejuvenate the skin. It has improved drilling and efficiency compared to traditional rollers, a superior effect on collagen and elastin rejuvenation. It has both multispeed control and adjustable needle depth. The results obtained allow a continuous rejuvenation for healthy skin.

Features & Benefits

- Adjustable needle depth 0.25mm to 3.0mm
- Improves wrinkles, minimises pore size & induces skin tightening
- Stimulates collagen production which promotes rejuvenation
- Improves surgical, traumatic, burn & acne scars
- Improves hyperpigmentation

Microneedling Step By Step

Treatment Area

- Scalp
- Face, neckline, hands & other body areas
- Neck, face & double chin
- Inner surfaces of arms & legs, abdomen & flanks
- Hip, fat, double chin, flanks & abdomen fat
- Knees and legs

Indications

- Hair Loss*
- Hyperpigmentation*
- Wrinkles*
- Flaccidity*
- Localised Fat*
- Cellulite*

The Procedure

1 Pre - Cleanse

Apply Salicylic 10% Acid to the treatment area.

2+3 Cleansing & Toning

Clean the skin with cleanser and toner.

4 Pre - Needling

Apply half of the solution chosen from the mccosmetics range onto the treatment area.

5 Application Of The Technique

Install the cartridge and select needle length depending on the desired outcome. Perform the technique on the skin.

6 Post - Needling

Apply the remaining skincare solution.

7 Soothing & Repairing

After completing the session, apply a hydrating mask to soothe, repair and decongest the skin.

8+9 Hydrating

Complete the treatment by applying hyaluronic serum and moisturising cream to protect the skin.

The Products

1 mccosmetics Sali-cyclic 10%

Salicylic, a beta hydroxyl acid, is a superficial peeling and a keratolytic agent which enhances the epidermis and renews the skin.

30ml

**VitaPhase Light Therapy 3 In 1
Red - Green - Blue Light**

The VitaPhase LT is the most versatile beauty option since it provides for the treatment of many facial skin problems: redness, acne, wrinkles, loss of firmness or dull complexion. It differs from the other devices on the market, because it offers 3 colours on the same device as well as the possibility of combining 2 colours at a time. Each colour penetrates the skin at a specific depth and generates distinct effects. The blue colour produces a purifying effect on the sebaceous glands and acne, the green colour reduces redness appearance caused by broken precapillaries while red diminishes the signs of ageing. Give radiance to your clients face and minimise their small skin defects.

Features & Benefits

- Ergonomic design
- May be connected to some Dectro devices
- Meets international standards, One-year warranty
- Composed of 21 light-emitting LED diodes
- Integrates 3 colours, independently operated: red (625nm), blue (470nm) and green (528nm)

- 2 modes: Light Therapy and Pulsing Light Therapy
- Integrated adjustment of light pulse frequency
- Portable version available (VitaSensa SM)
- Signs of ageing reduced
- Soothed redness appearance
- Acne appearance diminished

Vibrotherapy Massager

The Vibrotherapy Massager is equipped with 5 applicators for different treatments. Digital unit mounted on a wheel-base column and a tray to fit the different applicators.

Applicator 1 Silicone round-shaped applicator with long prong to apply massage in great depth.

Applicator 2 Silicone round-shaped applicator with multiple short prongs that works at the epidermis depth. Suitable for stimulation, exfoliation, vasodilation and revitalisation massage treatments. It is used on the back, thighs and buttocks.

Applicator 3 Smooth and versatile sponge circular applicator conceived for sensitive parts of the body. It applies a soft and light massage. It is used before and after starting treatments to prepare the tissues and release tension.

Applicator 4 Rubber square-shaped applicator with 4 half balls. Ideal for massage on shoulders, back, thighs and buttocks.

Applicator 5 V-shaped sponge applicator suitable for working the shoulders, neck, back, legs and knees zones. It is appropriate for relaxing treatments so as to combat daily stress.

Results

- Stimulate the cellular proliferation
- Eliminate the cutaneous imperfections
- Provide a greater firmness of the skin
- Contribute to a quicker cutaneous regeneration
- Improve the cellular nutrition and the oxygenation
- Eliminate toxins and give a greater luminosity to the skin
- Improve the lymphatic drainage and the decongestion
- Provide a well-being and relaxing sensation
- Unblock and reduce the excess fat

Suitable For

- Cellulite and dimply skin
- Tired legs
- Liquid retention
- Slimming and toning treatments
- Osteoarticular pain
- Stress and tiredness
- Lymphatic problems
- Muscular problems
- Anti-stress treatment
- Lymphatic drainage massage
- Muscular toning
- Supplementary physiotherapy treatments

Overline Lipo Cavitation

The Overline Lipo Cavitation is an innovative multifunctional body treatment unit which combines three of the most effective therapies in the treatment of cellulite and body re-shaping. There are 6 different types of electric waves that can be combined together, enabling various body programs to be chosen.

Features & Benefits

- Provides treatment for all body issues
- 4 Single therapy programs and 3 Ultramix therapy programs
- Easy to use & immediate results
- Overall more sculpted & contoured body shape
- Works on stubborn areas & appearance of fat & cellulite
- Painless non-surgical alternative to Liposuction

Single Therapy Programs

1 Ultrasound Cavitation

Cavitation is a non-invasive fat reduction treatment that uses cutting edge ultrasound technology to reduce fat cells in targeted parts of the body. The process warms and vibrates fat cell deposits and converts them into liquid that is eliminated through the body's own natural lymphatic filtration system.

2 Electrolipolysis - Cellulite Treatment

Electrolipolysis is an effective inch-loss technique which heats the fat through high temperatures and prompts the body's natural lymphatic system to drain the fat cells. It involves the application of controlled electrical microcurrents that help drain the areas where fat tends to accumulate, usually on the thighs, buttocks, hips and lower abdomen.

3 Electrosculpting - Toning Treatment

A range of electrical wave length frequencies, which works on all three muscle groups, providing real exercise, toning and reshaping for the body.

4 Draining

Specific electrical wave length frequencies to provide highly specific and efficient lymphatic drainage. This frequency can also be used for relaxation.

Ultramix Therapy Programs

1 Ultrasound Cavitation & Electrolipolysis

Compact Cellulite treatment helps to prevent the build-up and accumulation of serum in the interstitial tissue, leading to a reduction in the separation and disassociation of the adipose cells which would otherwise cause a break-up of the cells themselves.

Oedematous Cellulite treatment is used to help solve the problem of the adipose cell leading to a reduction in the problems known as hyperplasia and hypertrophy which are normal defensive actions of the fibres when the oedematous phenomenon persists.

Flabby Cellulite treatment is used to help solve the problem of the adipose cell leading to a reduction in the atrophy of the skin, localized sclerosis of the derma with introfections (responsible for the so-called "orange peel skin").

Adipose Cellulite treatment is used for any stage of cellulite: oedematous, modification of the adipose cell or formation of the micro nodules of the first stage.

2 Ultrasound Cavitation & Electrosculpting

The advantages of the combination of ultrasound/infrared and muscle stimulation derive from the fact that ultrasound has a lipolytic activity. In other words, it moves the fat from inside the adipose cell and transfers it to the blood. Muscle contraction, especially if the red muscle fibres are stimulated, uses the fats to provide the energy to perform the contraction and therefore consumes the fat that would otherwise circulate and accumulate once again. Recommended mainly for widespread, hard and flabby cellulite with muscle hypotonia.

3 Ultrasound Cavitation & Drainage

The ultrasound stimulates the circulation and lymph and the electrical frequencies drain the removed toxins to the lymph nodes. This combination is mainly effective in cellulite with liquid retention, aedematous cellulite, assumption of the contraceptive pill and food intolerance.

Apilus VitaDerm 4000

The VitaDerm 4000 is the result of intense scientific research and extensive consultations with aesthetic professionals and physiotherapists who are experts in their field. The Vitaderm's microcurrent circuitry, controlled by advanced and unique technology, ensures impressive results from any facial electrolifting or silhouette remodelling treatment. By emitting a very specific microcurrent, the Vitaderm 4000 system is able to stimulate effectively, to restore the full vigour of youth to the face and body.

Modes

VitaLift - Facial Lifting

The VitaLift mode offers you 4 treatment options designed to give the face a smooth and youthful aspect.

1 Drainage Facial

- Revitalises the skin
- Favours toxin elimination
- Clears up complexion and minimises the appearance of dark circles under the eye

2 Specific Stimulation - Hand-Held Electrodes

- Stimulates specific area of the face to meet the needs of each client

3 Automatic Stimulation - Self-Adhesive Electrodes

- Firms the skin
- Yields a lifting effect
- Remodels the facial oval

4 Personalised Stimulation

- Designed to create and program advanced stimulation treatments in automatic or specific mode

TRAINING INCLUDED

1401

£3,495.00

VitaGym - Body Remodeling

The VitaGym mode offers you 4 treatment options designed to improve the overall body figure.

1 Presso-Drainage

- Revitalising and stimulating
- Promotes toxin elimination

2 Firming

- Firms the skin

3 Cellulite

- Promotes oxygenation of skin
- Minimises the look of 'orange peel' texture of cellulite
- Remodels the body figure

4 Stress Relief

- Relieves heaviness and discomfort sensation
- Promotes relaxation

VitaLize

The VitaLize mode will allow you to offer specific ionophoresis treatments for the face and body. While deep-cleansing emulsifies excess sebum on the skin surface, ionization enhances the absorption of cosmetic products and yields a smoothing effect.

VitaSense

The VitaSense mode allows aestheticians to determine the moisture level of their client's skin, enabling them to recommend the appropriate treatments and skincare products. Simple, quick and practical.

Smart Duo Radio Frequency

This Smart Duo RF machine comes with a multipolar handpiece for the face and body.

TRAINING INCLUDED

1400
 £2,695.00 **FREE DELIVERY** to mainland UK

Multipolar Radio Frequency Face

This treatment is used to achieve skin rejuvenation. It works by increasing the subcutaneous temperature, causing the denaturation of the Collagen proteins, resulting in a reorganization of the skin tension lines. It also activates the fibroblasts which, following the thermal shock, over time increase the production of Collagen and Elastin with consequent increase in dermis consistency, for a significant lifting effect.

Multipolar Radio Frequency Body

Multipolar RF exploits the characteristics of both monopolar and bipolar methods to bring energy under the skin, plus it has the advantage of focusing the range of action in a single point through the 4-pole system. In this way, higher temperatures can be obtained both on the surface (40°C) and in the deeper layers (43°C up to 2cm). The multipolar handpiece also allows to operate at lower powers and therefore with relatively longer treatment times without creating discomfort and / or pain for the client.

Silhouette Full Clinic Faradic 20 Pad

The Dermalift F20 is a mono & bi-directional faradic system, offering the complete range of facial and body faradic treatments. Featuring 10 outlets over a 20 pad system, the stimulation from the F20 can be randomised to prevent muscle anticipation, providing a much more efficient toning session. Separate contract and rest controls allow the relevant pulse periods to be varied from 0.1 - 2.5 seconds individually, whilst the master gain control function increases the stimulation current across all outputs by up to 20% via one control switch.

4 STEP STARTER KIT

Retinol Anti-Ageing Starter Kit

Whether you are a first-time user of Retinol or need a convenient set for travel, our Anti-Ageing Starter Kit is the perfect solution for you.

Anti-Ageing Gel Cleanser 60ml

Delivers the skin renewal benefits of Retinol while washing away make up and other impurities trapped in your pores. As you wash, pink and white pearl micro-beads provide an added burst of the skin-renewing benefits of Retinol and antioxidant and of vitamin E to smooth and treat your skin as you cleanse.

Anti-Ageing Vitamin A Eye Gel 7g

Reduces visible signs of ageing around the delicate eye area. This effective eye gel will help minimise the appearance of puffiness and dark circles while restoring tone and elasticity.

Anti-Wrinkle Facial Serum 15ml

Is a potent solution to preventing and correcting common signs of age and environmental stress. It visibly improves skin's elasticity & tone while minimising the appearance of fine lines and wrinkles. This powerful serum is formulated with one of the highest levels of vitamin A in our Retinol skincare regime.

Anti-Ageing Night Cream 20g

Is a rich, luxurious multi-benefit cream that works while you sleep to reduce signs of ageing. Wake up with smoother, softer skin and a more radiant, youthful glow. Firming action tones face and neck.

TREAT & REPAIR

Retinol Super Starter Kit

Supercharged with the proven power of vitamin A. Super Retinol products are enriched with Vitamins C & E to encourage renewal and support healthy skin for a more sculpted and youthful look.

Super Serum 15 ml

Retinol Super Serum contains the highest level of vitamin A in our Retinol line. It restores the look of smooth, beautiful and glowing skin with 3 Million I.U.'s of Retinyl Palmitate. This unique night-time accelerator encourages your skin's renewal process while you sleep. It lifts and firms as it targets lines, wrinkles, dark spots, pores and blemishes.

Super Face Lift 7g

Visibly firms and tightens for a lifted, younger look. Infused with Retinol, Vitamins C & E, this firming blend is a beauty "quick-fix". Not limited to the face,

it can transform the neck and décolletage, leaving skin looking visibly smoother within minutes.

Super Eye Lift 7g

A luxurious 3-in-1 treatment fights the look of dark circles, wrinkles, and puffy eyes. The Retinol and peptide formula helps smooth the appearance of fine lines and wrinkles. The unique tint visibly "colour corrects" and brightens under-eye circles, blending into all skin tones, while the cooling massage applicator helps de-puff around the eye area. Its Retinol formulation gives an extra boost of firmness around the eye area.

mccosmetics[®] NY

mccosmetics is a company that specialises in manufacturing and exporting cosmetic products developed for the health, beauty and wellbeing sector.

Their main goal is to satisfy your clients needs offering them effective solutions for facial and body treatments through the best selection of active ingredients.

All the mccosmetics products are created due to the expertise and research of capable professionals with years of experience.

mccosmetics Magic Champagne Anti-Ageing Treatment

Magic Champagne contains active ingredients which provide an intensive, anti-ageing treatment with an immediate effect. They stimulate the organism defence mechanisms to combat effectively the factors that accelerate skin ageing. At the same time, it provides exfoliating properties that provide deep skin cleansing, removing any dead cells and closed pores. It reduces dramatically the appearance of redness, sun spots and acne marks. During the treatment sessions the skin becomes visibly younger, smooth and uniform. Wrinkles and fine lines fade, reducing skin imperfections. The result is a rejuvenated, glowing skin.

Recommended For

Pigmentation changes, expression lines and wrinkles,
Increases blood circulation

mccosmetics Melanopeel Pack

Effective and safe solution to reduce and eliminate pigmentation of melanic origin.

Melanopeel is a topical depigmentation treatment to reduce and eliminate skin blemishes in the epidermis of melanic origin. The active ingredients of Melanopeel help block melanin production and reduce spots of melanic origin in the epidermis, clearing and rejuvenating the skin. At the same time, it prevents skin ageing, increases exfoliation of dead cells and stimulates collagen production. In order to achieve maximum efficacy, it synergistically combines different whitening agents that inhibit the melanogenesis process in different stages, blocking the production of melanin. It also has exfoliating agents that accelerate the cell renewal process and produce epidermal desquamation, eliminating the melanin found in the keratinocytes and lightening the skin tone. The combination of depigmenting active agents with antioxidants and anti-free radicals clears and rejuvenates the skin, at the same time as it stimulates the production of collagen. The addition of solar filters guarantees long-lasting results, preventing the reappearance of blemishes.

SkinMate Portable Facial Steamer

The steamer will hold up to 300ml of purified water, which will allow for approximately 30 minutes of steam time. Fully insulated handle and sturdy base and the steamer arm swivels up to 360°, which allows for total control and versatility. The vapour spraying arm can be adjusted up, down and at an angle of 90°. A low water cut out device ensures safety at all times, the heater will automatically switch off when water is below the minimum level. We recommend that purified water is always used in the portable steamer.

Therabath Pro Paraffin Bath

Soothe your joints, muscles and skin with the therapeutic benefits of this wax bath with 6 bags of paraffin wax included. Paraffin moist heat therapy has been used for almost a century for relieving the pain and inflammation of arthritis. It is also highly effective as a treatment for other joint and muscle pain, as the heat relaxes muscles and stimulates circulation. Paraffin is also very beneficial for the skin as it will soften and hydrate any dry or cracked patches, so a paraffin bath is excellent for enhancing beauty treatments like facials, manicures and pedicures.

SkinMate Deluxe 3 Section Electric Couch

This British Made SkinMate Deluxe 3 Section Electric Couch is a fully automated, 4 motor, ergonomically designed couch encompassing every beauty treatment from facials to pedicures.

This couch comes complete with:

- Breather hole and plug
- 7.5cm thick upholstery
- Locking wheels
- Paper roll holder

Each couch is specially made to order.
Please allow 2 - 6 weeks for delivery.

Features also include:

- A functional design providing the performance you expect for treatment success, allowing access from every angle
- Infinitely adjustable to ensure that therapist stature is not compromised and correct working posture is guaranteed
- The simple elegance of the contoured cushions give a greater work surface and increased client comfort
- Articulating, infinitely adjustable backrest for maximum comfort and access, finished with 7.5cm deep luxury upholstery
- Tilt adjustment for comfortable knees up positioning
- Twin headrest features, one that is long and rounded, used for the chair position, massage and body treatments. The other is short and contoured for facial work and specialised procedures
- Small base frame foot print will give maximum leg and knee room with the additional benefit of remaining exceptionally sturdy and stable without losing flexibility
- Effortless, silent lift height adjustment that descends low enough for wheelchair transfer
- A superior performance couch that gives universal flexibility
- Abrasion resistant upholstery that is hard wearing, also providing the benefit of low surface friction
- Unique foldaway, reversible armrests, that become part of the upholstery when not in use
- Vertical action footrest that moves freely into the frame, to allow the use of foot spas and pedinett trays
- The couch is finished with a durable, powder coated, scratch proof frame with locking castors for ease of movement
- 3 Year Guarantee on Electric motors

If you would like to contact a member of our team for more information on courses, dates and packages available call us on 01480 404200 or email training@hofbeauty.co.uk

Terms & Conditions

The following conditions are accepted by the Buyer and the Seller.

Definitions

In these terms and conditions 'The Seller' means House Of Famuir Ltd and 'The Buyer' means the purchaser of goods from 'The Seller' under these terms and conditions.

Trade Only

House Of Famuir Limited operates exclusively as a wholesaler, it does not sell directly to the General Public. It does not deal with Consumer Sales. All sales are to the Trade. By placing an order with House Of Famuir Limited you are confirming that you are not a Consumer for the purposes of the Consumer Credit legislation and for the Purposes of Sale of Goods legislation and that you are in business and purchasing the goods for the purpose of that business and not for personal use. All products sold are intended for those qualified in the beauty trade and are for sale on a trade only basis. Customers should be qualified to use the products sold. Goods are sold on the understanding that they will be used for their intended purpose. No responsibility will be accepted by The Seller, for trained or untrained personnel without qualified supervision using or mis-using equipment supplied by The Seller. If you are a business customer, it is your responsibility to ensure that you are insured for products that you are using and we reserve the right to ask you for proof of professional status.

Prices

This catalogue is valid until 31/03/2023. Prices and special offers are correct at the time of print but are subject to alteration without prior notice. Prices are exclusive of VAT at the ruling rates and delivery costs. It is possible that some of the products in our catalogue may be mis-priced.

We will verify pricing when processing your order and before we take payment. If we have made a mistake and a product's correct price is higher than the price shown, we may either contact you before shipping to request whether you want to buy the product at the correct price or cancel your order. If a product's correct price is lower than our stated price, we will charge the lower amount and send you the product.

Delivery charges outside mainland UK will be verified when processing your order. If we have made a mistake and the delivery charge is higher than the price quoted on the website, we may contact you before shipping to request whether you want to continue with your purchase at the correct delivery charge or cancel your order.

Special Offers

Please note that all offers are subject to availability. Further discounts cannot be applied to items in clearance.

Overdue Accounts

After 40 days a surcharge of 4% of the gross amount will be levied on a daily basis.

Your Online Account

If you use this website you will be responsible for maintaining the confidentiality of your account and password and for restricting access to your computer to prevent unauthorised access to your account. You agree to accept responsibility for all activities that occur under your account or password. You must ensure that the password is kept confidential. If you believe that your password has become known to anyone else, you must inform us immediately.

House Of Famuir Limited reserves the right to refuse access to the website, terminate accounts, or cancel orders at our discretion. If we cancel an order you will not be charged.

Payment

Payment is due in full prior to dispatch of goods if a credit arrangement is not agreed beforehand. Payment is due 30 days from the date of invoice where a credit agreement exists.

Please note, delivery addresses cannot be changed on an order by a customer once payment has been taken. We are unable to change your delivery address on orders paid by PayPal.

If you wish to make amendments to your delivery once an order has been made,

please speak to a member of our Customer Service Team.

Online Orders

When you place an order to purchase an item from House Of Famuir Limited, we will send you an email confirming receipt of your order and containing the details of your order. Your order represents an offer to purchase a product which is accepted by us when we despatch that product to you. That acceptance will be complete at the time we despatch the product to you. Any products on the same order which are not despatched, do not form part of that contract.

Returned Goods

If goods have been ordered in error or are not as expected: Please contact our Customer Services Department on 01480 404200 to request a returns authorisation number.

If goods have been ordered in error or are unsuitable, The Buyer must pay for the return postage.

The relevant reference number must be quoted on accompanying documentation. Goods must be returned within 7 days of receipt, unused, in perfect condition and sent back in it's original packaging.

If items are returned as unsuitable:

The Buyer will only be entitled to a refund on the item purchased and not the original postage paid. This process can take between 7-10 days to complete and for a refund to be issued.

Carriage for any alternative items is to be paid for by The Buyer. The Seller accepts no responsibility for items lost in transit. It is recommended that a receipt of posting is obtained and it is the Buyers responsibility to ensure adequate insurance is purchased to cover the items being returned.

Any faulty items which are still under the manufacturer's warranty must be reported and sent back for inspection, once the goods are received back we will determine whether the item(s) can be repaired, if this is not the case then a replacement will be issued. If we are unable to either repair or replace the item(s) then a full or partial refund may be issued. This process can take between 10-14 days, there are exceptions to this policy due to hygiene reasons - see exclusions.

Our warranties run from the initial date of purchase, if we have made the decision to replace a product that is still under warranty then this does not mean that you receive a new warranty when you receive a replacement. In essence the contract that you make at the time of sale, which includes the warranty, is formed at the time when you paid the money. Issuing a replacement is something that occurs under the original agreement and it does not mean that you receive a new warranty. Therefore, it is important to be aware that your original warranty will expire on the original purchase, rather than the clock being re-set on the warranty at the time when your item is replaced.

Refunds on large/heavy items will be subject to a minimum 10% handling charge.

Items received with broken seals will incur a 10% handling fee and those without original packaging will be subject to a 25% re-stocking fee.

Collections for unsuitable items will be subject to a minimum 10% handling charge. Collection of goods with a value of £50.00 or less and parcels returned to sender will be subject to a minimum charge of £5.00 per parcel.

Due to strict hygiene regulations, the Seller cannot accept returns of items such as tweezers and electrolysis needles which have been used. (This list is not exhaustive). Goods returned damaged due to poor packaging will not entitle The Buyer to a full credit/refund. Your Statutory Rights are not affected.

Shortages & Damages

Goods must be inspected on delivery and all claims for shortages or damages must be reported to The Seller within 24 hours of receipt of goods.

Delivery Charges

£6.95 plus VAT is the standard delivery charge for most parts of mainland UK. The Channel Islands, Offshore islands, Highlands, Scottish Islands and certain areas of the UK may vary according to the size and weight of the parcel. Special delivery charges will be quoted on request. This includes any large or heavy items. Orders placed online over £75, excluding VAT, to most parts of mainland UK qualify for free delivery. Free delivery over £75 does not apply to orders where a promotional discount has been applied. Additional re-delivery fees incurred as a result of The Buyer not being available to receive their order, need to be paid before goods can be re-delivered.

Delivery

The Seller's policy is to despatch goods within 24 hours of receiving an order, however this can vary subject to stock availability. Times quoted are in good faith, but shall not be binding. The Seller can accept no responsibility for transport delays causing late delivery. Some furniture orders may take up to 2-6 weeks for delivery. Extra handling charge may be incurred for re-despatched parcels. Additional re-delivery fees incurred as a result of The Buyer not being available to receive their order, need to be paid before goods can be re-delivered.

House Of Famuir is not liable for delayed, missing or damaged parcels/contents if a delivery signature has not been obtained where the parcel has been left in a designated safe place at your request. If you choose to have your order delivered to a location you deem as 'safe' then the liability transfers to you.

Please note, delivery addresses cannot be changed on an order by a customer once payment has been taken. We are unable to change your delivery address on orders paid by PayPal. If you wish to make amendments to your delivery once an order has been made, please speak to a member of our Customer Service Team.

Next Day Delivery

If orders are received, fully completed and payment taken before 2pm GMT between Monday to Thursday, we aim to deliver them the next working day. Dispatch times can vary depending on stock availability and any guarantees made as to delivery times are subject to any delays that can result from transport delays or force majeure, for which we will not be held responsible. The Seller can accept no responsibility for transport delays causing late delivery.

Next day delivery only applies to items that are in stock. Does not apply to items that are sent direct from our supplier, or large or heavy items. Next day delivery is only available to mainland UK. Some areas of the UK cannot receive Next Day Delivery - contact Customer Services for more information. Please note, we cannot guarantee Next Day Delivery following a Bank Holiday Weekend.

Large and Heavy Items

For large and/or heavy items on order you are advised to have assistance on hand as our couriers will only deliver kerbside and will not enter premises or deliver up or down stairs.

Overseas Orders

Please note, that all electrical items are supplied with a UK 3 pin plug as standard. We welcome orders from around the world. Carriage charges will vary depending on destination and weight of parcel.

For more information on placing an order for overseas delivery, please contact Customer Services on +44 1480 404200 Delivery of overseas orders may be affected due to political conflicts, such as war, civil unrest, martial law etc.

Customs For Overseas Orders

When ordering goods from House Of Famuir Limited for delivery outside the United Kingdom you may be subject to import duties and taxes which are levied once the goods reach the specified destination. Any additional charges for Customs clearance must be paid by you; House Of Famuir Limited has no control over these charges and cannot predict what they may be. If you are ordering goods from outside the United Kingdom, it is

your responsibility to comply with all the laws and regulations in the country in which you are receiving the goods.

If you refuse to pay the charges levied by customs and excise and the goods are returned to us then you will be liable for the return shipment fees and these will be deducted from any refund due.

Cancellations

Prior to despatch, non standard items such as furniture/special order items, cannot be cancelled. Cancellation after despatch cannot be accepted.

Product Availability

All products are subject to stock availability. Stock availability is shown on the website, however if we have insufficient stock to fulfil the order, we will notify you by e-mail at the address given by you in your registration form. Stock is allocated on a first come first served basis once your order reaches our main server. The Seller doesn't guarantee the availability of any item based on stock figures shown.

Web Content

All content included on the website is the property of House Of Famuir Limited or our suppliers. All software used on this website is the property of House Of Famuir Limited or our software suppliers. You may not extract or reutilise part of the contents of the website without the written consent of House Of Famuir Limited.

Force Majeure

House Of Famuir shall be entitled to cancel or delay delivery of orders if it is delayed, hindered or prevented from delivery through circumstances beyond its control. Such circumstances shall include (but are not limited to) industrial action, accident, fire, Act of God or failure to deliver by suppliers or carriers.

General

All offers are subject to stock availability. The Seller reserves the right to restrict or refuse any order for application of credit at any time. The Seller takes special care to show correct sizes and specifications and such descriptions, whilst given as a guide, in good faith, are subject to alteration by The Seller without notice. All colours are as near as can be displayed on a computer monitor.

Company Details

House Of Famuir Limited
College Farm, Duloe, St Neots, PE19 5HQ
Registration No.04160698
VAT No.789071976

Guarantee

All items are guaranteed according to the individual manufacturer's warranty. Any faulty items which are still under the manufacturer's warranty must be reported and sent back for inspection, once the goods are received back we will determine whether the item(s) can be repaired, if this is not the case then a replacement will be issued. If we are unable to either repair or replace the item(s) then a full or partial refund may be issued. This process can take between 10-14 days, there are exceptions to this policy due to hygiene reasons - see exclusions. All glass items are specifically excluded from this guarantee.

Jurisdiction

These terms and conditions and all contracts entered into under them are governed by and are to be construed in accordance with the laws of England and Wales. You agree to submit to the jurisdiction of the Courts of England and Wales in relation to any contract entered into under these terms and conditions.

Retention of Title Clause

1. The risk in all goods passes to The Buyer upon delivery but title in the goods remains vested in The Seller and shall only pass from The Seller to The Buyer upon full payment being made of all sums (due on whatsoever account or grounds) to The Seller.

2. The Buyer agrees, prior to the payment of the whole price of the goods, The Seller or appointed agents may enter The Buyers premises to collect such goods should The Seller request. Prior to such payment, the Buyer shall keep the goods separate and identifiable for the purpose and return the goods to The Seller should The Seller request.
